The Freeze is over and the clean-up begins....

We're seeing mountains of dead plants pile up on the curb all over Hunters Creek. Our Trash guys will not pick most of this up and we can't have it out there for weeks.

So here is my suggestion: Instead of filling up our precious landfills with organic yard waste, you can have your yard guys take to Living Earth mulch sites. Go to www.livingearth.net for info on drop off sites. There is a nominal charge for dumping, but this will get your stuff composted, not fill up the dumps, benefit the environment, and keep it off the curb!

- See attached Flyer concerning other Garbage and Recycling pick-up instructions.

Also, lots of great resources online for determining what will survive and when is the best time to cut your plants back, if interested. It's going to be a great Gardening Spring!
