OK, water is good to go. Memorial Villages Water did independent tests to be sure and gave the all clear.

Run the lines you drink from for a minute and throw out your ice. Also, if your refrigerator has a water spigot in the door, drain it for a bit and it will be fine.

Another day of no school.... enjoy your kids being home again after they were out all last week. They'll be out of school again in a few weeks....

Drink away.

Jim Pappas
